

MINIMBAH THIRD TRACK PROJECT

Client: Ansaldo-STS

Project Description: Installation of Main Cable Route

Site Location: Minimbah, NSW

The Minimbah project was successfully designed and installed in three major stages. Commissioning of all three stages was completed before the set due dates allowing the \$8.3 Million project to be completed within the eight month time frame.

The scope of works included:

- Design for the installation of 12km signalling infrastructure, locating services and project budget
- Three new rail underbores; grade separation of Range Road level crossing; replacement and realignment of Golden Highway overbridge; services relocation; signalling works and property acquisition
- Installation of infrastructure cabling; relocation of LOC's; pit installation; pot-holing; set up of compound including full worksite facilities; construction of main access road, including drainage
- Progress reporting and weekly updates to client

Arogen was also engaged for the Environmental Management Plan for the total works estimated at \$100 Million
